Hi Everyone, I am E. - 46 years old living in Ginkelom, near St Truiden.

Spontaneous of nature, I am a communicative team player.

I hold a bachelor's degree in systems administration which I acquired like 20 years ago in the coldest capital of the world...Ulaanbaatar.

I moved to Belgium early 2000 and it is my dream to work as a junior java developer in a dynamic team.

I have recently finished an intensive full time 8 month Java course.

Sewing and knitting is my ideal recipe to relax from the daily hustle and bustle having 4 teenagers around in the house.

Walks in nature do the trick as well 😊.

Looking for a next member in your team for a full stack java development position? Let's talk!

Within a few months a Bachelor of Applied Computer Science. In addition, already a in 2021 completed full time 10 month intensive training (mainly backend but also frontend). On top of that 3 month training through Udemy (a.o. Soft Skills, Angular, SpringBoot, Xamarin, Design Patterns C#)

- Java 11 fundamentals, GIT, Spring, Hibernate, JDBC, Junit/Mockito, Maven, Mysql, CSS/HTML/Javascript, AngularJS, REST TOOLS, Spring MVC.

Broad interest in positions like java developer (frontend/backend/fullstack), tester, .NET developer.
