- Photoshop

Hi everyone, I am W. VB - 29 years old living in the center of Leuven. In my spare time you can find me jamming on my electric guitar or fighting against a strict deadline to deliver in group a video game during the timespan of a game-jam weekend.

I love board games and my favorite character in the Jungle Book is Baloo the Bear.

My favorite meal when I am hungry?
Chili Sin Carne, muchas gracias!

I hold a bachelor's degree multimedia and I have recently finished an intensive full time 8-month Java course. Front End Development is my forte, I am a creative brain with a keen eye for detail.

No need to look further: You have found your junior front end developer or software tester right here.
